

## **Who's Priorities?**

Reflections from Ebola and COVID contexts in the DRC

Trish Newport, Médecins Sans Frontières

# EBOLA VIRUS

EBOLA IS A DEADLY VIRUS. IT SPREADS QUICKLY AND KILLS!

## HOW TO PREVENT IT FROM SPREADING

1. Avoid contact with the blood and body fluids of people who are sick with Ebola. If you must care for someone who is sick, wear protective clothing and gloves. Wash your hands often with soap and water.

2. Avoid contact with bats, monkeys, and other animals that may carry the virus.

3. Wash your hands often with soap and water. Use hand sanitizer if soap and water are not available.
